

# Prisms

## Product Information

Prisms are transparent optical elements with flat polished surfaces that refract, reflect or disperse light. They allow easy positioning within an optical system and have excellent thermal stability. A total internal reflection is possible, avoiding light loss in the optical path.

## Advantages

- SCHOTT masters the entire value chain from raw glass to coated cemented prisms
- Custom designed products at competitive prices
- 1 piece through series production levels
- Coating: all substrates coated to a specific custom design
- Subassembly: We offer our expertise in gluing and cementing to integrate the prisms in custom designed hardware

## Materials

- Optical glasses such as N-BK7, N-SK4, SF57HHT, SF6HT, SF2, SF11
- Fused silica LITHOSIL®

## Examples of Products

- Right angle prisms
- Rhomboid prisms
- Pentaprisms
- TIR prism
- Cube beamsplitter

## Manufacturing Capabilities

Attribute	Commercial Quality	Precision Quality	Ultra Precision Quality
Size	10 to 200 mm	10 to 200 mm	10 to 200 mm
