

SCHOTT Termofrost®

the clear choice for cold and frozen display

SCHOTT Termofrost® is a registered trademarks of SCHOTT AG, Mainz, Germany.

SCHOTT Termofrost®

Doors at the forefront

SCHOTT Termofrost® glass doors are ideal for all types of cold rooms for the display and storage of chilled products such as beverages, dairy products down to +2°C, and frozen goods down to -25°C.

Self-closing, condensation-free door systems are essential for displaying goods at the right temperature and the lowest possible energy costs.

The vertical lighting shows the product at their very best, which contributes to increased sales.

Toughened glass and anodized aluminium give our systems lasting durability and aesthetic appeal.

Model description

T = Standard height, 1601 mm

S = Super height, 1801 mm

R = Roll In, 1903 mm

Three door widths:

660 mm and 760 mm

Maxi Twin 2x450 mm

NT = Normal Temperature,
cold display, down to +2°C

LT = Low Temperature,
freezer display, down to -25°C

SCHOTT Termofrost®

Selling displays requiring minimal space

With twin narrow doors and no centre mullion, Maxi twin is a glass doors system that makes optimal use of retail space, providing maximum cold storage space and display area.

Narrow doors mean minimal opening radius in front of the display, which is a definite advantage in small shops such as convenience stores and petrol stations.

Maxi twin is a module-adapted for 45 cm dairy containers, which simplifies handling.

Large display areas and easy handling

With Roll In doors, you can create a sales environment that enables unique display of chilled food products, beverages or flowers.

Roll In glass doors extend right to the floor, giving a larger display area. The doors can be mounted with or without a low threshold, which facilitates handling of e.g. heavy containers.

Roll In doors are practical for smaller cold rooms behind which there are no storage areas.

SCHOTT Termofrost®

Flexi Shelf Pro – the complete shelving system

Flexi Shelf Pro – an appealing and flexible shelving system for chilled and frozen goods.

Flexi Shelf Pro helps create an attractive, logical display and simplifies stocking and inventory management.

Many advantages with Flexi Shelf Pro

- A complete system with accessories such as front stops, price marking strips, dividers and pin-packs.
- Wire shelves mounted with adjustable consoles provide the desired angle, enabling gravity feed that ensures a constantly replenished cold or freezer display front.
- The shelving system can be combined with its predecessor, Flexi Shelf.

Shelving systems that make life easier

Flexi Shelf Pro is stocked from the rear, which guarantees first in, first out. In the cold room, the need for stocking is noticed immediately and it is easier to maintain the display front.

An article code list at the rear of the shelves simplifies the replenishing.

The shelving system has only two uprights, which are mounted at the front. This makes it easier to clean and rearrange the shelves.
