

# SCHOTT® Flat Glass

## Product Information SCHOTT SatinPlus®

Source: Alno

## Product Description

- SCHOTT SatinPlus® is a high value security glass with a matt and translucent finish. The glass surface is partially etched resulting in a satin-finish and at the same time displays the depth effect of glass.
- Partially etched glasses combine the matt surface with a clear transparent window (e.g. for oven doors, control panels or other home appliance applications).
- The backside of the glass is printed with ceramic ink and is available in a broad range of colours.
- SCHOTT SatinPlus® is a thermally toughened float glass with high impact resistance.
- The novel surface has a satin feeling, is easy to clean and finger prints disappear right away.
- SCHOTT SatinPlus® follows the trend of high tech glass solutions that offer new design possibilities in the kitchen for an innovative look with matching kitchen and home appliance fronts out of glass.
