

Plastic closure systems

and customized moulding

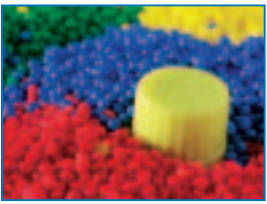

Closure systems made of plastic ensure perfectly packed healthcare products

Being globally recognized as a specialist in primary packaging for the pharmaceutical and diagnostic industry the worldwide operating SCHOTT covers your needs.

We base our products on continuous research and development using high-quality materials and the latest technology. In addition to many years of experience in glass packaging, SCHOTT offers a wide range of plastic parts. We provide various closure systems exactly fitting your screw-neck vials and tablet bottles and a comprehensive program of technical parts.

Quality you can rely on

Safety and quality right down to minute details determine the perfect condition of the whole. GMP rules are important guidelines for our validated production processes. Within a certified DIN EN ISO 9001:2000 quality management system, all steps in production are controlled.

Your entry in the US market is supported by our FDA Drug Master File Type III registration. Permanent improvement and investments continually optimize our production and services. Regular and successful audits conducted by the largest pharmaceutical companies confirm our approach.

Precision and accuracy to meet your needs

Excellent conditions for manufacturing pharmaceutical products

State-of-the-art technology in moulding, clean production environment and a wide selection of thermoplastic materials combined with the knowledge and experience of SCHOTT characterize our production and are prerequisites for high quality products you can rely on. Choose from a wide selection of materials, shapes and colours. Your specific requirements are our challenge.

Extensive product and service range

Caps and closures

Screw caps for glass vials

- ▶ with tamper evident and child resistant design
- ▶ with or without wad (e.g. Triseal, butyl Teflon)
- ▶ with integral plug seal

Closure systems for tablet bottles

- ▶ stoppers with or without spring
- ▶ tamper evident caps with or without spring

Customized moulding

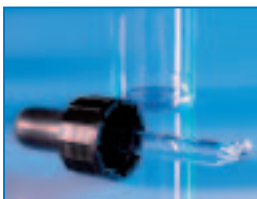

Technical parts

- ▶ Components in all shapes and colours for laboratory and diagnostic use
- ▶ Components for medical devices and drug delivery systems
- ▶ External specialists in tool-making guarantee your individual tool design
- ▶ Inhouse tool maintenance

Special know-how

Dual-component moulding

- ▶ Combinations of different types of plastic
- ▶ Combinations of metal and plastic
- ▶ Combinations of glass and plastic e.g. SCHOTT PURGARD® – internal glass vial and outer polymer jacket for robustness and safety

Partnership for your benefit

Deciding on SCHOTT means choosing a comfortable and safe business approach: complete packaging solutions from one source.

We look forward to creating mutual benefit by tailor-made solutions, guaranteeing quality as well as individuality.

Challenge us – we shape your ideas.
