

Coloured glass toughens up

Take a look around and you will see that colour is a growing trend in buildings and architecture, as owners and designers want to stamp their own identity onto their property.

Now available in thicknesses of 6mm and above, SCHOTT IMERA[®] body tinted coloured glass opens up the opportunities to add colour in double glazed units.

Available from Pearsons Glass, the range of colours currently includes blue, black, amethyst and yellow, with more in the development pipeline. IMERA[®] can be combined with traditional glazing materials to afford multi-coloured double glazed units. With the option of various processing techniques including cutting, drilling and polishing, IMERA[®] gives the flexibility to safely incorporate colour into structural elements.

For more information contact Pearsons Glass on 0151 207 1474 or email info@pearsonsglass.co.uk.
