Revision date:

22.10.2020 Revision No:**1,0**

Print date:

11.12.2020**Material Data Sheet**

according to 29 CFR 1910.1200(g)

1. Identification**Product identifier**

Poweramic GHz33

Further trade names

none/none

REACH-registration status: This substance is exempted according to REACH Article 2 (7) and Annex V.

Substance name: glass, oxide, chemicals

CAS No.: 65997-17-3

EC No.: 266-046-0

Recommended use of the chemical and restrictions on use**Use of the substance/mixture**

Glass

Reserved for industrial and professional use.

Uses advised against

Do not use for private purposes (household).

Details of the supplier of the Material Data Sheet

Company name:	SCHOTT AG	
Street:	Hattenbergstr. 10	
Place:	D-55122 Mainz	
Telephone:	+49 (0)6131 / 66 0	Telefax: +49 (0)6131 / 66 20 00
Contact person:	Dr. Kristian Eichgrün	
e-mail:	ehs-compliance.ao@schott.com	
Internet:	www.schott.com	
Responsible Department:	Qualitätsmanagement Advanced Optics	
	Telephone: +49 (0)61 31 / 66 21 55	
	Telefax: +49 (0)36 41 / 28 88 90 54	

Emergency phone number: +49 61 31 / 66 2393 (Mo - Fr, 7 - 16 Uhr; MEZ; UTC+01)**2. Hazard(s) identification****Classification of the chemical****29 CFR Part 1910.1200**

This substance is not classified as hazardous in accordance with Regulation 29 CFR 1910.1200(d).

Label elements**Additional advice on labelling**

GHS label elements, including precautionary statements: none/none

Hazards not otherwise classified

In case of inhalation (particulates and dust):

Irritation to respiratory tract. A repeated, excessive dust exposure can cause pneumoconiosis.

3. Composition/information on ingredients**Substances**

**Poweramic GHz33**

Chemical characterization

glass, oxide, chemicals

CAS No.: 65997-17-3

EC No.: 266-046-0

As the substance glass is not included in the candidate list of substances of very high concern, currently there are no information duties according to article 33 of REACH. However for the production of glass we may use substances, which are on the candidate list and had been included in Annex XIV of the REACH regulation or could be included in future. These powdery substances are not present as such in the final glass; they are fully integrated into the glass matrix through the melting process. Thus they lose their original characteristics. With unintended use, some of these substances may be released from the matrix and become bioavailable.

The main components of the glass batch are listed as additional information in chapter 16.

4. First-aid measures**Description of first aid measures****General information**

When in doubt or if symptoms are observed, get medical advice.

After inhalation

Provide fresh air. If experiencing respiratory symptoms: Call a doctor.

After contact with skin

particulates and dust: In case of skin reactions, consult a physician.

After contact with eyes

particulates and dust: Rinse immediately carefully and thoroughly with eye-bath or water. Remove contact lenses, if present and easy to do. Continue rinsing. In case of eye irritation consult an ophthalmologist. Pay attention to the protection of the non-contaminated eye.

After ingestion

particulates and dust: Get medical advice/attention.

Most important symptoms and effects, both acute and delayed

No known symptoms to date.

Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

5. Fire-fighting measures**Extinguishing media****Suitable extinguishing media**

Co-ordinate fire-fighting measures to the fire surroundings.

Specific hazards arising from the chemical

The product itself does not burn. In case of fire may be liberated: Metal oxide smoke, toxic

Special protective equipment and precautions for fire-fighters

Wear a self-contained breathing apparatus and chemical protective clothing. Full protection suit.

Additional information

Suppress gases/vapours/mists with water spray jet. Collect contaminated fire extinguishing water separately. Do not allow entering drains or surface water.

6. Accidental release measures**Personal precautions, protective equipment and emergency procedures**

Provide adequate ventilation. Avoid dust formation. Do not breathe dust. Avoid contact with skin, eyes and clothes. Use personal protection equipment.

Material Data Sheet

according to 29 CFR 1910.1200(g)

Environmental precautions

Do not allow to enter into surface water or drains.

Methods and material for containment and cleaning up

Take up mechanically. Treat the recovered material as prescribed in the section on waste disposal.

Reference to other sections

Safe handling: see section 7

Personal protection equipment (PPE): see section 8

Disposal: see section 13

7. Handling and storage

Precautions for safe handling

Advice on safe handling

Provide adequate ventilation. Avoid dust formation. Do not breathe dust. Avoid contact with skin, eyes and clothes. Use personal protection equipment.

Advice on protection against fire and explosion

No special fire protection measures are necessary.

Conditions for safe storage, including any incompatibilities

Requirements for storage rooms and vessels

Keep locked up. Store in a place accessible by authorized persons only. Provide adequate ventilation as well as local exhaust at critical locations. Store in a dry place.

Hints on joint storage

Do not store together with: Strong acid, hydrofluoric acid, phosphoric and phosphorous acid, Alkali (lye), concentrated

Further information on storage conditions

Protect from moisture.

8. Exposure controls/personal protection

Control parameters

			10		STEL (15 min)	REL
-	Zirconium compounds, as Zr		5		TWA (8 h)	ACGIH-2020
			10		STEL (15 min)	ACGIH-2020

Exposure controls**Appropriate engineering controls**

Provide adequate ventilation as well as local exhaust at critical locations. Technical measures and the application of suitable work processes have priority over personal protection equipment.

Protective and hygiene measures

Remove contaminated, saturated clothing immediately. Disposal of contaminated protective clothing separately, do not reuse. Draw up and observe skin protection programme. Wash hands and face before breaks and after work and take a shower if necessary. When using do not eat or drink. Avoid dust formation.

Eye/face protection

Wear eye/face protection.

Hand protection

Wear suitable gloves. (cut-resistant)

Skin protection

Wear suitable protective clothing. Disposal of contaminated protective clothing separately, do not reuse.

Respiratory protection

In case of inadequate ventilation wear respiratory protection.

Environmental exposure controls

Do not allow to enter into surface water or drains.

Material Data Sheet

according to 29 CFR 1910.1200(g)

9. Physical and chemical properties**Information on basic physical and chemical properties**

Physical state: solid
 Color: colorless
 Odor: odorless

Test method

pH-Value: 8,2 (on solid) OECD 122

Changes in the physical state

Initial boiling point and boiling range: not determined

glass transition temperature: 748 °C ISO 7884-8

Flash point: not applicable

Flammability

Solid: not applicable

Gas: not applicable

Explosive properties

The product is not: Explosive.

Lower explosion limits: not applicable

Upper explosion limits: not applicable

Ignition temperature: not applicable

Auto-ignition temperature

Solid: not applicable

Gas: not applicable

Decomposition temperature: > 1300 °C

Oxidizing properties

Not oxidising.

Vapor pressure: up to Tg no significant vapor pressure is to be expected

Density (at 20 °C): 4,67 g/cm³

Water solubility: Immiscible

Solubility in other solvents

not determined

Partition coefficient: The substance is not soluble in water.

Viscosity / dynamic: not applicable (solid)

Viscosity / kinematic: not applicable (solid)

Vapor density: not applicable

Evaporation rate: not applicable

Other information

Odor threshold: not determined

10. Stability and reactivity**Reactivity**

No hazardous reaction when handled and stored according to provisions.

Chemical stability

**Poweramic GHz33**

Revision date:

22.10.2020 Revision No:**1,0**

Print date:

11.12.2020**Material Data Sheet**

according to 29 CFR 1910.1200(g)

Stability: Stable

The product is stable under storage at normal ambient temperatures.

Degassing takes place from temperatures above: >1300 °C

Possibility of hazardous reactions

Hazardous reactions: Will not occur

Reacts with : Strong acid, hydrofluoric acid, phosphoric and phosphorous acid, Alkali (lye), concentrated

Conditions to avoid

Humidity

Temperature > point of degassing (Formation of: Metal oxide smoke, toxic)

Incompatible materials

Strong acid, hydrofluoric acid, phosphoric and phosphorous acid, Alkali (lye), concentrated

Hazardous decomposition products

Metal oxide smoke, toxic (Temperature > point of degassing)

11. Toxicological information**Information on toxicological effects****Route(s) of Entry**

oral, dermal, inhalative, Eye contact

Acute toxicity

Based on available data, the classification criteria are not met.

The toxicological potential of glasses results from the bioavailability of individual components when used improperly.

This is determined by the bioaccessibility test according to Fraunhofer. It is a leaching method of the material performed in 5 artificial body fluids.

Acute oral toxicity: no bioaccessibility detected

Acute dermal toxicity: no bioaccessibility detected

Acute inhalation toxicity: no bioaccessibility detected

Irritation and corrosivity

Based on available data, the classification criteria are not met.

Sensitizing effects

Based on available data, the classification criteria are not met.

Carcinogenic/mutagenic/toxic effects for reproduction

Based on available data, the classification criteria are not met.

Specific target organ toxicity (STOT) - single exposure

Based on available data, the classification criteria are not met.

Specific target organ toxicity (STOT) - repeated exposure

Based on available data, the classification criteria are not met.

Carcinogenicity (IARC): Titanium dioxide (CAS 13463-67-7) is listed in group 2B.

Aspiration hazard

Based on available data, the classification criteria are not met.

Practical experience**Other observations**

In case of inhalation (particulates and dust):

Irritation to respiratory tract. A repeated, excessive dust exposure can cause pneumoconiosis.

12. Ecological information**Ecotoxicity**

The ecotoxicological effect of glasses is determined by the ecological accessibility of hazardous substances that can be released under environmental conditions from the glass matrix. For characterization, the test from the German landfill regulation (Dep-VO) is used. In the evaluation, the leachable hazardous substance content, in relation to the total amount of the per se non-hazardous glass, is treated as a standard mixture proportion and classified accordingly.

Result / evaluation: The product is not: Ecotoxic.

Persistence and degradability

The product has not been tested.

Bioaccumulative potential

The product has not been tested.

Mobility in soil

The product has not been tested.

Other adverse effects

No information available.

Further information

Avoid release to the environment.

13. Disposal considerations**Waste treatment methods****Disposal recommendations**

Do not allow to enter into surface water or drains. Neither the product nor the residues from the processing. Dispose of waste according to applicable legislation.

Contaminated packaging

Dispose of waste according to applicable legislation.

14. Transport information**US DOT 49 CFR 172.101****Proper shipping name:**

No dangerous good in sense of this transport regulation.

Marine transport (IMDG)**UN number:**

No dangerous good in sense of this transport regulation.
