

# SCHOTT Premium Reading Light

SCHOTT® Star

## SCHOTT® Star Reading Light systems

Integral to seat – follows seat movement

Localized lighting with a well-defined beam shape

Directionally adjustable by the user

Dimmable by the user (optional)

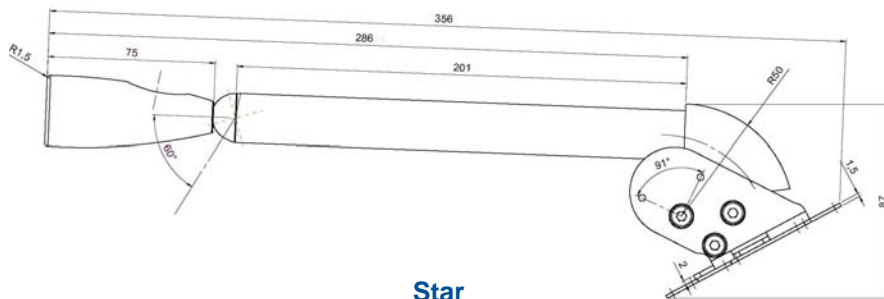

Less intrusive to neighboring passengers

Low power consumption of typically 0.8 to 1.5 W per seats means very low operating costs

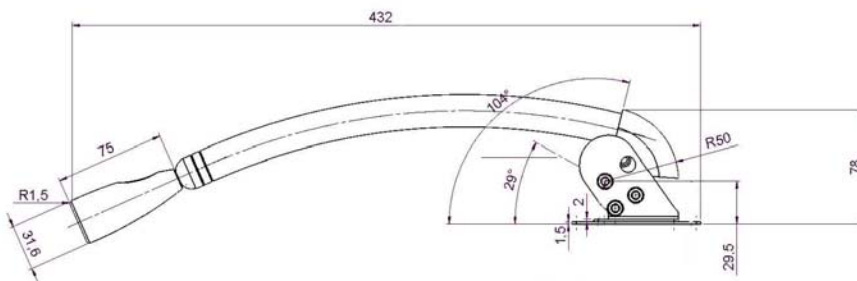

Qualification in preparation for all AIRBUS and BOEING Aircraft.

## Specifications

	Single LED	Multi LED
Power supply	5 to 7 VDC	11 to 13 VDC
Power consumption full power quiescent	Max. 1.8 W Max. 0.2 W	Max. 1.1 W Max. 0.2 W
Total current at full on	245 mA with 5 mA ripple	70 mA with 10 mA ripple
Typical weight	Approx. 450 g to 550 g	Approx. 450 g to 550 g

Star

Star, curved
