

# More Transparency for Multideck Cabinets

Generation T: Fully Transparent Insulated Glass Doors

SCHOTT Termofrost® T.AGD 3 for optimal food presentation

## Product description

For improved visibility of food presentation a new type of insulated glass door is now available. Due to their clear and transparent vertical edges, these doors provide 100% transparency. No matter where a product is presented on the shelf, it is fully visible, even behind the vertical edge of a door. SCHOTT offers two solutions:

- SCHOTT Termofrost® T.AGD 3 – swing doors for the product line AGD 3
- SCHOTT Termofrost® T.SDS 2 – sliding doors for the product line SDS 2

Transparent spacers let the vertical edges of both door systems appear invisible and thus consumers enjoy an unlimited view to food products presented in multideck cabinets.

## Door with transparent spacers

SCHOTT Termofrost® T.AGD 3

SCHOTT Termofrost® T.SDS 2

## Conventional door design

SCHOTT Termofrost® AGD 3

SCHOTT Termofrost® SDS 2

## Benefits

Transparent spacer compound offers a fully visible product display:

- Unlimited view of product presentation
- Same transparency as frameless door systems
- Perfect product presentation even behind the edge of a door
