

SCHOTT Termofrost®

SCHOTT Termofrost® Flexi shelf Pro shelving system

Product Description

SCHOTT Termofrost® Flexi shelf Pro creates an attractive, logical display and simplifies stocking and inventory management.

The system has been designed to meet the tough challenges of a commercial environment, and fits behind all our glass door systems, whilst providing a complete line of merchandising options for the retailer.

SCHOTT Termofrost® Flexi Shelf Pro is stocked from the rear, which guarantees first in first out. In the cold room, the need for stocking is noticed immediately and it is easier to maintain the display front.

Features

- A complete shelving system with accessories such as front stops, price marking strips, dividers, container stops, wire baskets and trolleys
- Wire shelves mounted with adjustable consoles provide the desired angle, enabling gravity feed that ensures a constantly replenished cold or freezer display thanks to the low friction surface of epoxy coated steel
- Sizes: fits behind all 660 mm, 760 mm, and 900 mm door systems.
- Custom Sizes available
- Colour: White or black
